Mohammed Ayyad

Studying a bachelor degree in Artificial intelligence and computer science at the University of Birmingham. I have acquired technical knowledge and skills throughout the First year of the course as well as practical skills from work experience and voluntary work. My interests lie in the fields of Software Engineering/Development, Artificial Intelligence, Machine Learning & Data Science, and Programming in general. I have a strong passion for solving complex technical problems, taking into account efficiency and performance.

Employment

Student Representative **Sep 2022 - Present**
University of Birmingham, Birmingham

- Presented positive and negative feedback to staff and other student representatives at relevant meetings to promote informed decision-making on new policies.
- Consistently worked to improve student learning experiences in partnership with Students' Association by creating solutions to long-standing problems.
- Represented the views of students on matters relating to the student learning experience.

IT Technical Support **Jun 2021 - Sep 2021**
Al Holoul Al Handasiya, Dubai

- Backed up servers regularly to reduce data loss.
- Conducted tactical troubleshooting to identify faults.
- Configured networks to meet performance requirements.
- Installed new hardware and software to meet system specifications and user needs.
- Upgraded hardware promptly to minimise service disruptions.

Student Ambassador and Student Representative **Sep 2020 - Jun 2021**
Kaplan International College, London

- Informed student body about upcoming events through knowledgeable and fun morning announcements daily.
- Consistently worked to improve student learning experiences in partnership with Students' Association by creating solutions to long-standing problems.
- Hosted tours for incoming students and families to show off campus and encourage applications.
- Conducted polls on upcoming school legislative votes to acquire accurate information on student views.

Education

BSc Artificial Intelligence and Computer Science **Sep 2021 - Jun 2025**
University of Birmingham
Predicted 2:1 but my goal is to achieve First class.

- **Year 1 Average - 67%**(Concepts in Computer Science, Object-Oriented Programming, Mathematical Foundations of Computer Science, Artificial Intelligence 1, Data Structures & Algorithms, Logic & Computation).
- **Year 2 Average - Ongoing** (Functional Programming, Team Project, Systems Programming in C/C++, Software Engineering, Security & Networks, Artificial Intelligence 2).

Foundation Certificate for Science and Engineering **Sep 2020 - Jun 2021**
Kaplan International College, London

- **Year Average -76%** Modules covered throughout the year (Information Technology, Intermediate Mathematics, Extended Project).
